

Diversification Activities

Diversification Activities

represent a new activity of the SARIO agency aimed to support the sector portfolio diversification of Slovak companies towards promising high-tech areas with significant growth potential.

Does your company operate in areas such as electronics, mechanical engineering, progressive materials or IT, and are you at the same time eager to innovate? Then our Diversification Activities are here for you!

We will help you to utilize the experience and technological potential of your company as well as to find new business partners in Slovakia and abroad.

[Space sector](#) [1]

The first sector of Diversification Activities is the space industry which brings not only high technologies but also high return on investment. At the same time, it opens up wide range of engagement opportunities for companies currently operating in other sectors, especially electrotechnics, mechanical engineering and IT.

Aviation sector

The aerospace sector represents a significantly growing area, bringing new opportunities for suppliers in the automotive, engineering, electronics or IT sectors.
