

## **Michal KOMPAN**

### **CRO & Expert researcher, Kempelen Institute of Intelligent Technologies**

Michal Kompan focuses on recommender systems, machine learning, user modeling, and information retrieval. His research focuses on predictive modeling and customer behavior (e.g., churn prediction, next-item recommendation) and content-based adaptive models. He specifically addresses recommender system diversity, fairness, and transparency. He has participated in many research projects in co-operation with industry, promoting and demonstrating the benefits of R&D.

As a teacher, he has supervised more than 50 Bachelor's and Master's theses.

To support the community, he has served as a reviewer or/and program committee member at several international conferences, such as RecSys, ADBIS, Hypertext, UMAP, and SMAP. He is a reviewer for several international journals in Springer, IEEE, ACM, Taylor&Francis, and Inderscience.
